Objective

Results-driven MERN stack developer with 2.5 years of experience in designing and implementing web applications. Proficient in complete web development stack, from front-end design using React to server-side scripting with Node.js. Skilled in database management using MongoDB and RESTful API development with Express.js. Experienced at collaborating with cross-functional teams with high-quality, responsive web solutions. Seeking to leverage my expertise and passion for cutting-edge technology to contribute to innovative projects.

Experience

Amdocs Development Center | Pune, India

Mar 2022 - Jan 2023

Implementation Developer

Key Result areas:

- Played a pivotal role in the code refactoring team, focussed on improving page speed and code quality for the entire project.
- Collaborated with a team lead and participated in the development of modern and responsive web interfaces, ensuring multiple platforms and devices.
- Translated wireframes and mockups into pixel-perfect, interactive web applications, working closely with the design team and under the guidance of the team lead.
- Implemented best practices in React.js, javascript, HTML and CSS to optimize website performance, speed and accessibility under the guidance and mentorship of the team lead.
- Successfully integrated third-party APIs and libraries to enhance website functionality, contributing to the overall project's success.
- Actively participated in the code reviews, proactively addressing issues and refining coding practices with guidance from the team lead to maintain high code quality.
- Contributed effectively to an agile development environment, engaging in sprint planning, daily stand-ups, and retrospectives, closely aligning with the team lead's direction.
- Achieved a 20% improvement in page speed as part of the code refactoring initiative, demonstrating a commitment to enhancing the user experience.
- Stayed current with emerging frontend technologies and trends, collaborating with the team lead to drive innovation and continually enhance development processes.
- Utilized Knowledge Transfers (KTs) to independently troubleshoot and resolve server and CI/CD deployment issues, ensuring smooth operations. Collaborated with DevOps for complex or severe issues.
- Proficiently managed and utilized Couchbase as a NoSQL database solution, ensuring data availability, scalability and high performance for critical application operations.

Projects Executed:

1. Digital Experience Layer R&D

Roles

- Worked with company's developing low code platform (Customer Engagement Center / Experience Manager) in CRM domain for telecom clients like Claro, T Mobiles & Singtel using React.js.
- Demonstrated in the flows for multiple LOBs, by using low code platform & showcase it to client.
- Worked on multiple POCs, to ease day-to-day tasks like recording mock response for data independency and smooth PR process.

Techbae Pty. Ltd. | Maidstone, Australia

Nov 2020 - Dec 2021

Web Developer

Key Result areas:

- Designed, developed, implemented the layout & design.
- Worked on API integration.
- Performed backend development and implementation of the logics, database schema structures.

Projects Executed:

1. Dealer Hero (Stock Management System)

Roles

- Mostly worked on backend development and created APIs as per the requirement.
- Tested the APIs using Postman. Technologies worked on: node.js, mongodb, express.js, cronjob scheduling.
- Platforms worked on : socket.io, stripe.

2. A1 Rideshare (Car Rental System)

Roles

- Mostly worked on the frontend development for implementation of the layout and design.
- Technologies worked on: react.js, redux, javascript, html/css.
- Worked on integration of the APIs.
- Platforms worked on: firebase.

Key Result areas:

- Worked on HTML, CSS, JavaScript, and React.js to create user-friendly and responsive web interfaces.
- Collaborated with team members to contribute to UI design discussions and integrate components into web applications.
- Identified and resolved UI-related issues and bugs, ensuring the quality of the user interface.
- Gained hands-on experience in web development technologies, enhancing skills in HTML, CSS, JavaScript, and React.js.
- Assisted in team projects and learned effective communication and collaboration in a professional environment.
- Adapted quickly to new technologies and tools, contributing to the success of the team's projects.

Skills

- Frontend Technologies:-1.HTML/CSS 2.JavaScript
- Javascript Libraries :- 1.Reactjs 2. React Native
- State Management in reactjs :- 1. Redux
- Backend Languages:-1.Nodejs 2.Expressjs
- Web Services :- 1.REST APIs
- Databases :- 1. MongoDB 2. Couchbase
- React frameworks :- 1. Next.js
- Version Control System :- 1. Git & Github
- Code Editors :- 1. Visual Studio Code 2. Sublime Text
- For testing Apis :- 1. Postman
- Frontend Css Frameworks:-1.Bootstrap 2. Tailwind css
- Platforms:- 1.Razorpay 2.firebase 3.socket.io
- CronJob Scheduling
- Other languages :- 1.c++ 2. Java
